What you doing with that there screen?

- Is it Informational?
- Is it Transactional?
- Is it an all out web application?

How literal do you wanna get?

Abstract

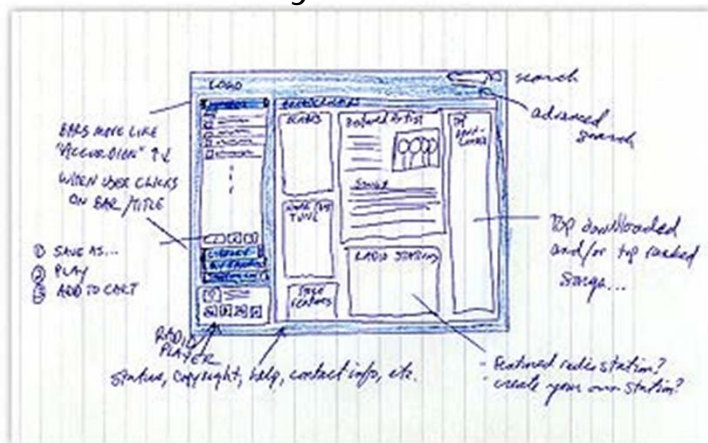

Realistic

Prototype!

Def: A manifestation of a design that allows stakeholders to interact with it and explore its suitability

Low-fidelity

High-fidelity

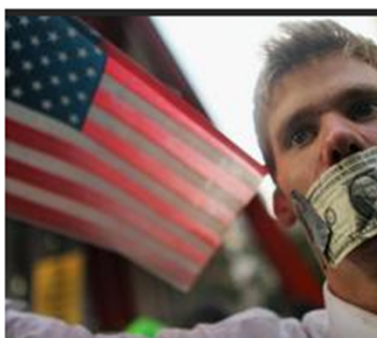

Physical stuff we can make

- Userflow Diagrams – What do we want the user to do
- Wireframe layouts – How do we want them to do it
- Mockups – Make it all look pretty

Wireframes: they don't have to be pretty.

...but they can be!

UrbanThought, inc

Internews

Data Visualization for Media Datasets

B: Inter

Notes

A) Secondary navigation area for the data visualizations. Links here go to **(C)** and **(D)**

B) Datasets listed on this particular visualization. Selecting one recolors the tab background and loads the new dataset (via ajax)

C) Map colored through this particular dataset

D) Information of particular number found through mouseover

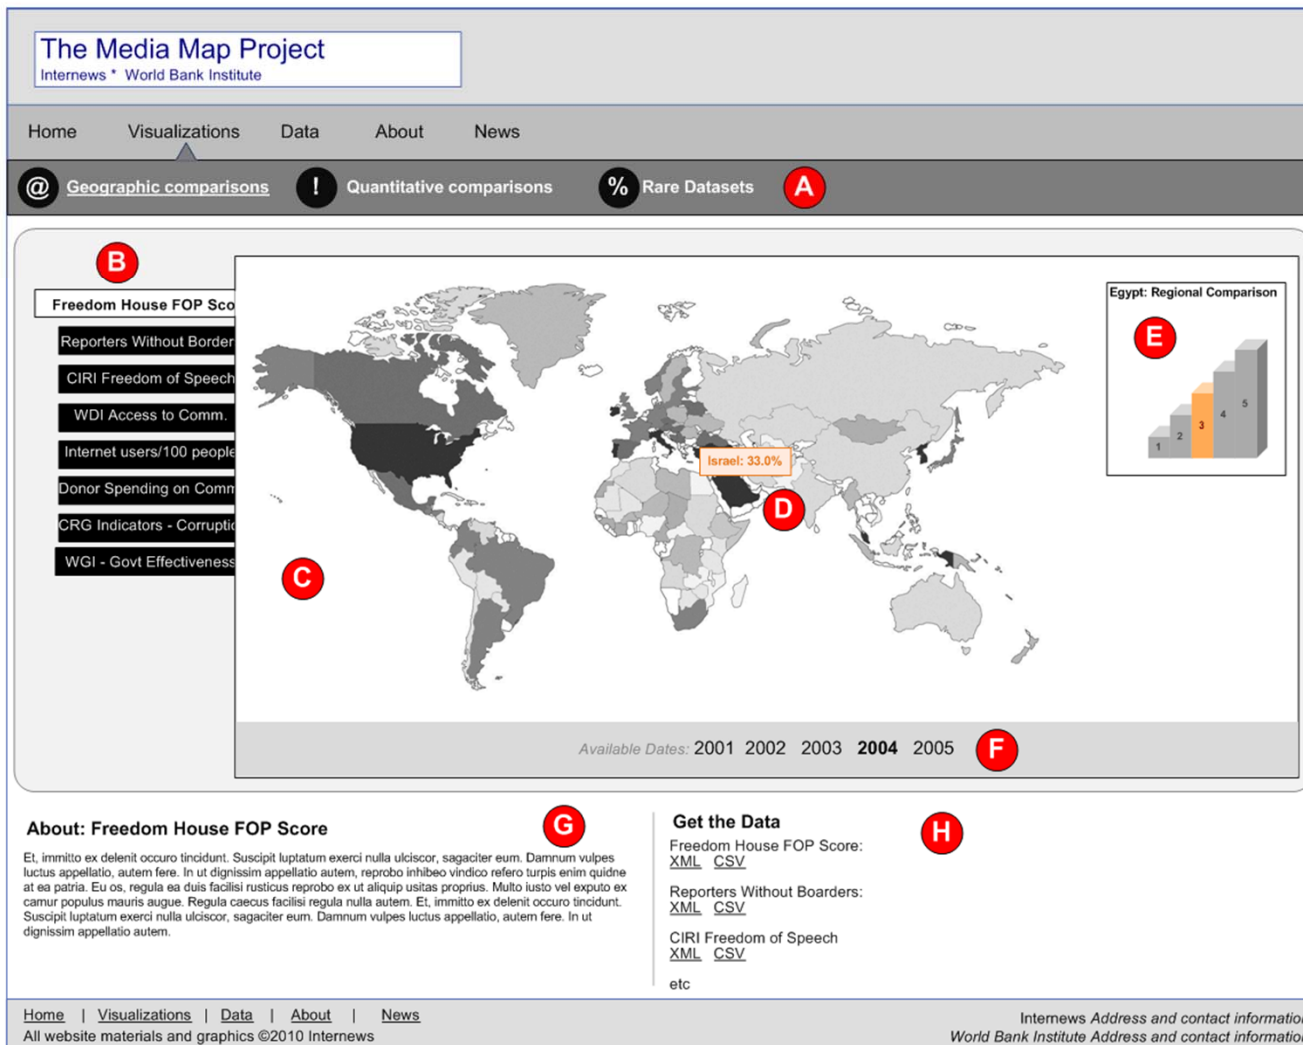

E) Optional: If there is time only, clicking on a country loads regional comparisons chart

F) Date selector. **Optional:** If there is time, this will be turned into a time slider.

G) Information about specific data selected. Area changes depending on data selection

H) Specific Data downloads for all data here.

NOTE: Some of these data sets we might wish to move to **(C)** if they show enough interesting information, and simply choose the best countries for that visualization
